

**Congressional Record Statement of Senator James M. Jeffords, I-Vt.
On the Introduction of the Vermont Wilderness Act of 2006**

April 6, 2006

Mr. Jeffords:

Mr. President, I rise today to join my colleague from Vermont, Mr. Leahy, in introducing the Vermont Wilderness Act of 2006. This legislation designates 48,051 acres within the Green Mountain National Forest for management under the 1964 Wilderness Act.

The Green Mountain National Forest constitutes more than 400,000 acres of woodlands in central and southern Vermont. The Forest hosts up to 3.4 million visitors each year and is capable of supporting a variety of uses, from timber production to snowmobiling to hiking, which contribute to Vermont's economy. The forest is also an important wildlife habitat and source of clean, fresh water. If well managed, the Green Mountain National Forest will remain one of Vermont's most precious environmental treasures, while continuing to support our state's economic and recreational needs for generations to come.

The National Forest Service is responsible for most aspects of national forest management but Congress reserved the authority to set aside undisturbed wilderness lands. Good stewardship of the forest requires leadership, and now is the time for us to accept this responsibility to designate additional wilderness areas.

Twenty-two years ago, as a member of the U.S. House of Representatives, I joined my Senate colleagues, Mr. Stafford and Mr. Leahy, to introduce the Vermont Wilderness Act of 1984. That act designated 41,260 acres as wilderness. Since that time the Green Mountain National Forest has acquired over 110,000 additional acres, while the populations of the state and the region have increased. These changing demands, and the changing landscape, provide the opportunity and drive the need to designate additional land as wilderness.

The Vermont Wilderness Act of 1984 directed Congress to consider additional wilderness designations in the Green Mountain National Forest only after 15 years had elapsed and the management plan for the Forest had been thoroughly reviewed. With last month's adoption of a completely revised Land Resource Management Plan for the Green Mountain National Forest, these conditions have been met and it is time to act.

I have worked for the past six years with the other members of Vermont's Congressional delegation, the National Forest Service, and State leaders. I have reviewed comments from thousands of constituents, visited the forest on the ground and viewed it from the air, and spent countless hours studying maps. These new designations are the result of thorough analysis and thought, and we do not make them lightly.

Many Vermonters disagree with the need for any wilderness designations, much less additional lands to be set aside at this time. I understand their concerns, but I also recognize the intent of the Wilderness Act of 1964, and I believe deeply in the benefits of managing some areas so that forces of nature hold sway.

The Vermont Wilderness Act of 2006 designates two significant new wilderness areas: the 28,491-acre Glastenbury wilderness in southern Vermont, and the 12,437-acre Battell wilderness in central Vermont. These are pristine, remote forest lands, and would remain undisturbed for future generations.

The recently completed Land and Resource Management Plan for the Green Mountain National Forest is a credit to everyone who worked on it, and reflects the hard work of the U.S. National Forest Service. This plan calls for additions to several existing wilderness areas including Peru Peak, Big Branch, Breadloaf and Lye Brook. These recommended additions are included in this legislation, with some modification.

This legislation also calls for 16,890 acres of the Moosalamoo Recreation Area in Central Vermont to be designated a national recreation area. Moosalamoo exists today as a world-class destination for widely diverse outdoor recreation activities on both public and private land. Moosalamoo is managed cooperatively by a group of owners and it attracts visitors from far and wide for hiking, camping, Nordic and alpine skiing and other activities. From the Robert Frost interpretive trails to the blueberry management areas and oak clad escarpments, Moosalamoo is uniquely deserving of national recreation area designation.

The Green Mountain National Forest is an important source of wood products and the timber industry is critically important to Vermont's economy. These wilderness and national recreation area designations are not meant to interfere with a robust timber management program within the forest, and I will work to support that program at every opportunity.

As we introduce this legislation it is important to acknowledge the fine work of Supervisor Paul Brewster and the staff of the Green Mountain National Forest. They applied great skill and technical expertise in developing the new management plan for the forest. The same professionalism will certainly be applied to implement the plan. Our wilderness designations differ somewhat from those proposed by the Forest Service, which is the reason this authority is

reserved for Congress, but the new management plan has helped to inform and guide our work.

It is with great pride that I join my colleagues to introduce the Vermont Wilderness Act of 2006. Our great state has been blessed with a beautiful natural landscape, which Vermonters have worked hard to preserve. This bill will continue in that tradition by helping to secure areas of the unspoiled wilderness that Vermont is known and admired for.

Mr. President, I yield the floor.
